

Skinner West Underwater Robotics Club

This year, Skinner West is participating in the Shedd Underwater Robotics Club, which provides educators with the knowledge, materials (an ROV kit worth \$1,000) and support to run their own after-school robotics clubs. The program culminates in a fun-filled poolside event on Saturday, March 28, 2020 where teachers and students can test their ROVs. Afterward, Shedd holds the annual Shedd Midwest Regional Marine Advanced Technology Education (MATE) ROV Competition, open to middle and high school underwater robotics clubs.

The club fee is \$50 (made payable to Skinner West) and enrollment is limited to 30 sixth-grade students. Students will be selected based on their interest level, previous experience with robotics, and/or ability to work well in groups.

WHEN: Wednesdays from 3:45pm to 5:15pm.

WHERE: Mrs. McGowan's Science Lab (Room 328)

FIRST MEETING: Wednesday, October 16, 2019

CLUB CELEBRATION: Saturday, March 28, 2020

I am VERY interested in the Underwater Robotics Club!

Name _____ Email _____

What is your experience with robotics, building, or engineering?

I will commit to weekly club meetings on Wednesdays YES/NO

I will attend the mandatory Club event on Saturday, March 28 2020 YES/NO

I, the parent or guardian of _____ give permission to participate in the Underwater Robotics Club. **Attached is the \$50 club fee.**
